

AUXDATA...Newsletter #8

Welcome

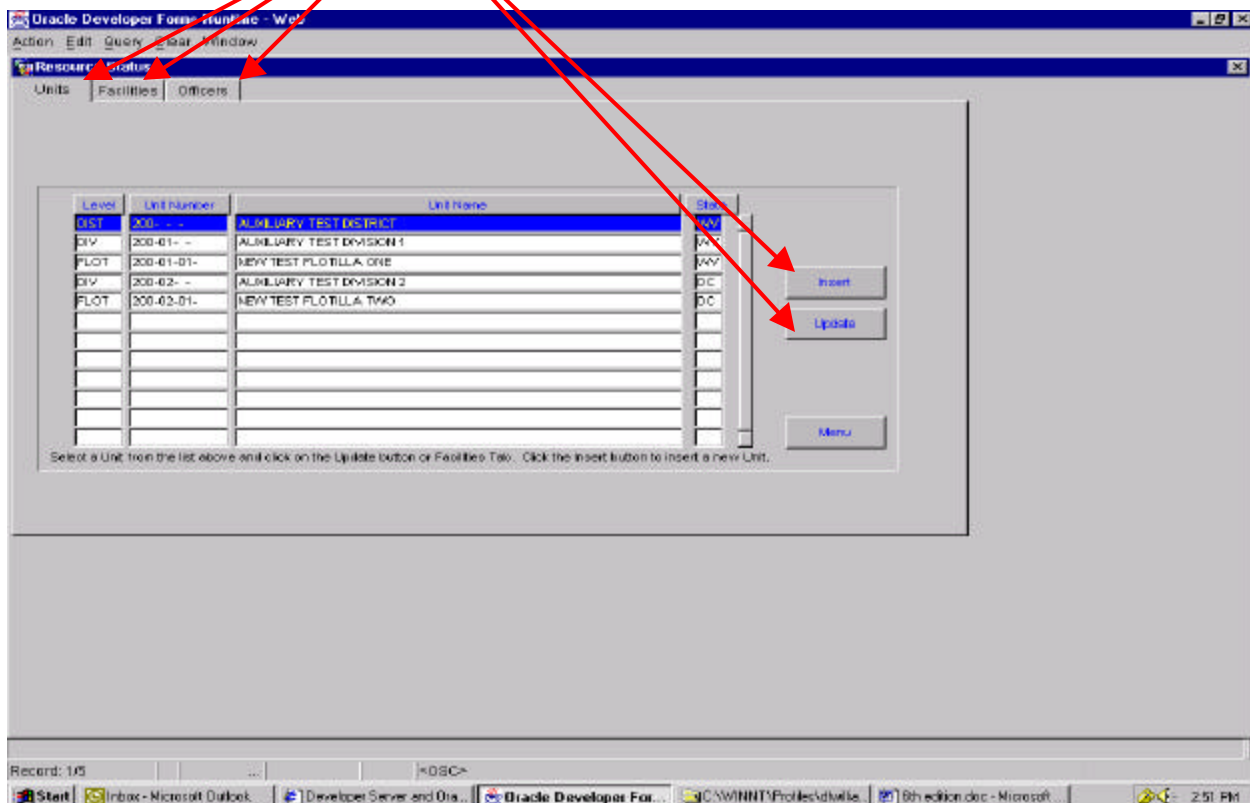

Welcome to our eight edition of the CG AUXDATA Newsletter dedicated to providing you with periodic updates on the new systems development cycle and links for all of you to view the "work in progress."

This issue will seek to familiarize you with the Resource Status module of our new application, AUXDATA.

The **Resource Status** module contains all the resources (facilities) belonging to your unit. Responsible personnel can readily view, insert, change and update a unit, resource (facility) or officers. The following screen captures are an exact reflection of what you will see upon entering the application. (Information in the cubes are for testing purposes only)

View, insert and update new or existing units, facilities or officers

Responsible personnel can toggle between operational facilities (resources) to update or insert new ones

Oracle Developer Forms Runtime - Web
